

GR-1751  
Canada  
Department of Indian Affairs. Central Registry  
Microfilm 16 mm. 1872-1950 91 reels [B0271 – B0361]

Correspondence, memoranda and reports relating to the administration of Indian affairs in Western Canada. The bulk of the records pertain to the period 1872-1930.

Some files listed in the finding aids are missing.

Finding aid: file lists (5 volumes - Black Series).

Purchased from the Public Archives of Canada, 1977.

Notes to researchers about the finding aid to this series:

This series of microfilm is the Black (Western) Series of RG 10, Records relating to Indian Affairs, Vols- 3555-4375., 5853, 5855-5856, 5858, 5860, 5863, 5865, 5867-5868, 5872, 5876, 5879, 5881, 5884, 5886-5887, 5892, 5894-5895, 5900, 5902, 5905, 5907, 5910-5912.

This series of files deals with almost all aspects of the administration of Indian Affairs in Western Canada, 1872-1959. Many of the early files were created by the Indian Commissioner for Manitoba and the Northwest Territories, while others are from the Manitoba Superintendency and the British Columbia Superintendency.

This series of records, often referred to as the Black (Western) Series to distinguish it from other series within the Central registry system operating in the Department of Indian Affairs from 1872 until changes were gradually made in the twentieth century, is accompanied by two separate finding aids or guides prepared by the Public Archives of Canada.

One finding aid consists of an indexed file list based on subject classifications and giving geographical references for each subject. By using this guide one obtains a file number. To find the reel which contains any file, one must use the conversion list that immediately follows this introduction. For example, if one is interested in School Buildings (a subject classification) in Alert Bay (a geographical designation), the index refers one to p.145 of the finding aid, which shows that file 21159 is wanted. The conversion list shows that file 21159 is on PABC reel no. B0298. Files have been filmed consecutively, but pages have not been numbered. When requesting microprint copies, researchers are requested to give full details as to the microfilm reel, file number and document (date, description, number of pages).

The second finding aid is a file list (not indexed) giving the subject matter and inclusive dates of each file. This file list runs to 542 pages. It may be used in conjunction with, or independently of, the first aid. It is probably best to use the indexed file list first before venturing to find a particular file in the longer, unindexed finding aid. This second finding aid gives the Public Archives of Canada reel number on which the file will be found. Again by using the conversion list one can obtain the correct PABC microfilm reel number.

The two finding aids are contained in three binders (Vols.1-3). This volume (Vol.1) contains the conversion list and the index to the shorter file list. Vol. 2 contains the shorter file list, and Vol. 3 the longer, unindexed file list.

Researchers should note that material on reel B-00371 may not be copied without the written permission of the Public Archives of Canada.

### CONVERSION LIST

C-10,098 to C-10,187 Indian Affairs, Black Series (1 Neg. 4 Pos.)
